

Greenhouse Gas Policy

In response to the increasingly severe challenges of climate change and environmental issues, RH Design Group demonstrates a strong awareness of the responsibility businesses have in environmental protection and sustainable development. We have incorporated greenhouse gas management into our daily operations, driving relevant actions to achieve sustainable business practices and promoting a low-carbon future for both the company and society.

Our Commitments:

- **Establish a Greenhouse Gas Inventory Mechanism:** Provide data support for reduction and management efforts.
- **Develop Greenhouse Gas Management Measures:** Optimize carbon emissions and enhance environmental benefits.
- **Comply with Regulations, International Standards, and Client Requirements:** Ensure compliant operations.
- **Promote Energy-Saving and Carbon Reduction Initiatives:** Encourage resource recycling and achieve sustainability goals.
- **Strengthen Environmental Awareness Among Employees:** Enhance employees' participation in and understanding of energy and environmental protection.
