

Specific Practices for Suppliers Management

The Company always considers its impact on the ecological environment and promotes the concept of sustainable consumption, all the operation activities of R&D, production and service which are in accordance with the following principles to reduce the impact of our business operations on the natural environment. We also encourage suppliers to improve their manufacturing process, quality, technology, environmental considerations, management capabilities, and corporate system to promote the environment awareness and concepts as well. In addition, by the approaches of screening, audit counseling, satisfaction surveys, training, supplier seminars and our long-term relationships with suppliers to achieve our quality requirements and satisfy the responsibility of the environmental safety and health management system, as well as deepen the implementation of corporate social responsibility.

- Reduce resource and energy consumption of products and services.
- Reduce the discharge of pollutants, toxic substances and waste, and properly dispose of waste.
- Improve the recyclability and reuse of raw materials or products.
- Optimize the sustainable use of renewable resources.
- Extend the durability of products and services.

Supplier Evaluation	Supplier Audit
<ul style="list-style-type: none">• Qualified suppliers are required to sign the Form of Supplier Social Responsibility Commitment	<ul style="list-style-type: none">• Our team tracks and improves the progress of suppliers' deficiencies to jointly improve quality and technology, refine processes, enhance environmental protection, safety and health performance, save energy and reduce waste.
Supplier Training	Supplier Communication
<ul style="list-style-type: none">• We hold small forums from time to time. Through different forms of guidance and communication, the performance of environmental protection and safety and health can be effectively improved and in line with international standards. The courses include labor safety and health, on-site safety management, and crisis response.	<ul style="list-style-type: none">• We hold supplier seminars from time to time. In addition to conveying sustainable principles and goals, suppliers are also welcome to raise questions and suggestions during these seminars.• Our suppliers can submit questions and suggestions at any time to the suppliers network
